WEB DEVELOPER AND AI ENTHUSIAST

Web Developer skilled in Frontend and MERN technologies with a strong foundation in Python, C++, and Java. Interested in building real-world applications and exploring AI/ML concepts.

SKILLS

Web Development: HTML, CSS, JavaScript, Tailwind CSS, React, Node.js, Express.js

Languages: Python, C++, Java

Database: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, VS Code, WordPress, Postman, Jupyter Notebook

Technical: Data Structures & Algorithms, OOPs, DBMS, Machine Learning Basics

Soft: Problem Solving, Teamwork, Communication, Adaptability

EXPERIENCE

Artificial Intelligence Trainee — 1Stop.ai

May 2025 – July 2025

- Built NLP-based text classification models using TensorFlow and pre-trained embeddings
- Gained practical experience in model training, evaluation, and improving performance

PROJECTS

SpendGage

 GitHub

- An AI-powered full-stack receipt and expense cost-per-unit calculator for indie creators.
- It tells them exactly how much it costs them to make one unit of their product, and warns them when rising ingredient prices are silently eating their profit.

TaskQuill

 GitHub

- A full-stack task management web application built with the MERN stack.
- Users can register, log in securely, and manage their daily tasks — add, edit, delete, and mark them as completed or pending.

SmartInvest

 GitHub

- Developed a machine learning model to predict stock returns and support data-driven portfolio decisions
- Applied Sharpe ratio with risk-free rate and implemented diversification techniques for optimized asset allocation

EDUCATION

B.Tech in Computer Science and Engineering

2024 – Present

K.R. Mangalam University, Gurgaon

CERTIFICATIONS

- GeeksforGeeks — C++ Course
- Google Cloud — Implement CI/CD Pipelines on Google Cloud
